

API Dust Caps

API Dust Caps are suitable for use with any API adaptor built to the API RP1004 standard.

API-DC is a standard Camlock API dust cap, which can be attached to the tanker via a chain.

API-DCLA is a lockable API dust cap and includes a cable (as pictured) for attachments to the tanker.

Technical Information

Operation

Uses the same closure principle as a Camlock and has the same cam arms.

Materials

- Aluminium body, metal arms and pins.
- Buna seal as standard, but Viton™ available on request.

Ordering Information

- **API-DC:** Aluminium API Dust Cap with Camlocks.
- **API-DCLA:** Aluminium API Dust Cap with lockable levers.

Dust Caps

Liquip offers a range of 3" and 4" Camlock Dust Caps.

Liquip's dust caps are made of high grade material to ensure superior protection and sealing and can be supplied in various material and seal configurations.
